

Additional file 3. Multiplication rate, the number of ring stages observed compared to the number of late stages observed the previous day, either cellulose-filtered (+) or non-filtered parasites (-) from day 1 to day 5. The lower whisker indicates the lowest data point above Q1 minus 1.5 times IQR, the upper whisker indicates the highest datapoint below 1.5 IQR plus Q3. Values below Q1 minus 1.5 IQR and above Q3 plus 1.5 IQR are indicated as points.
