

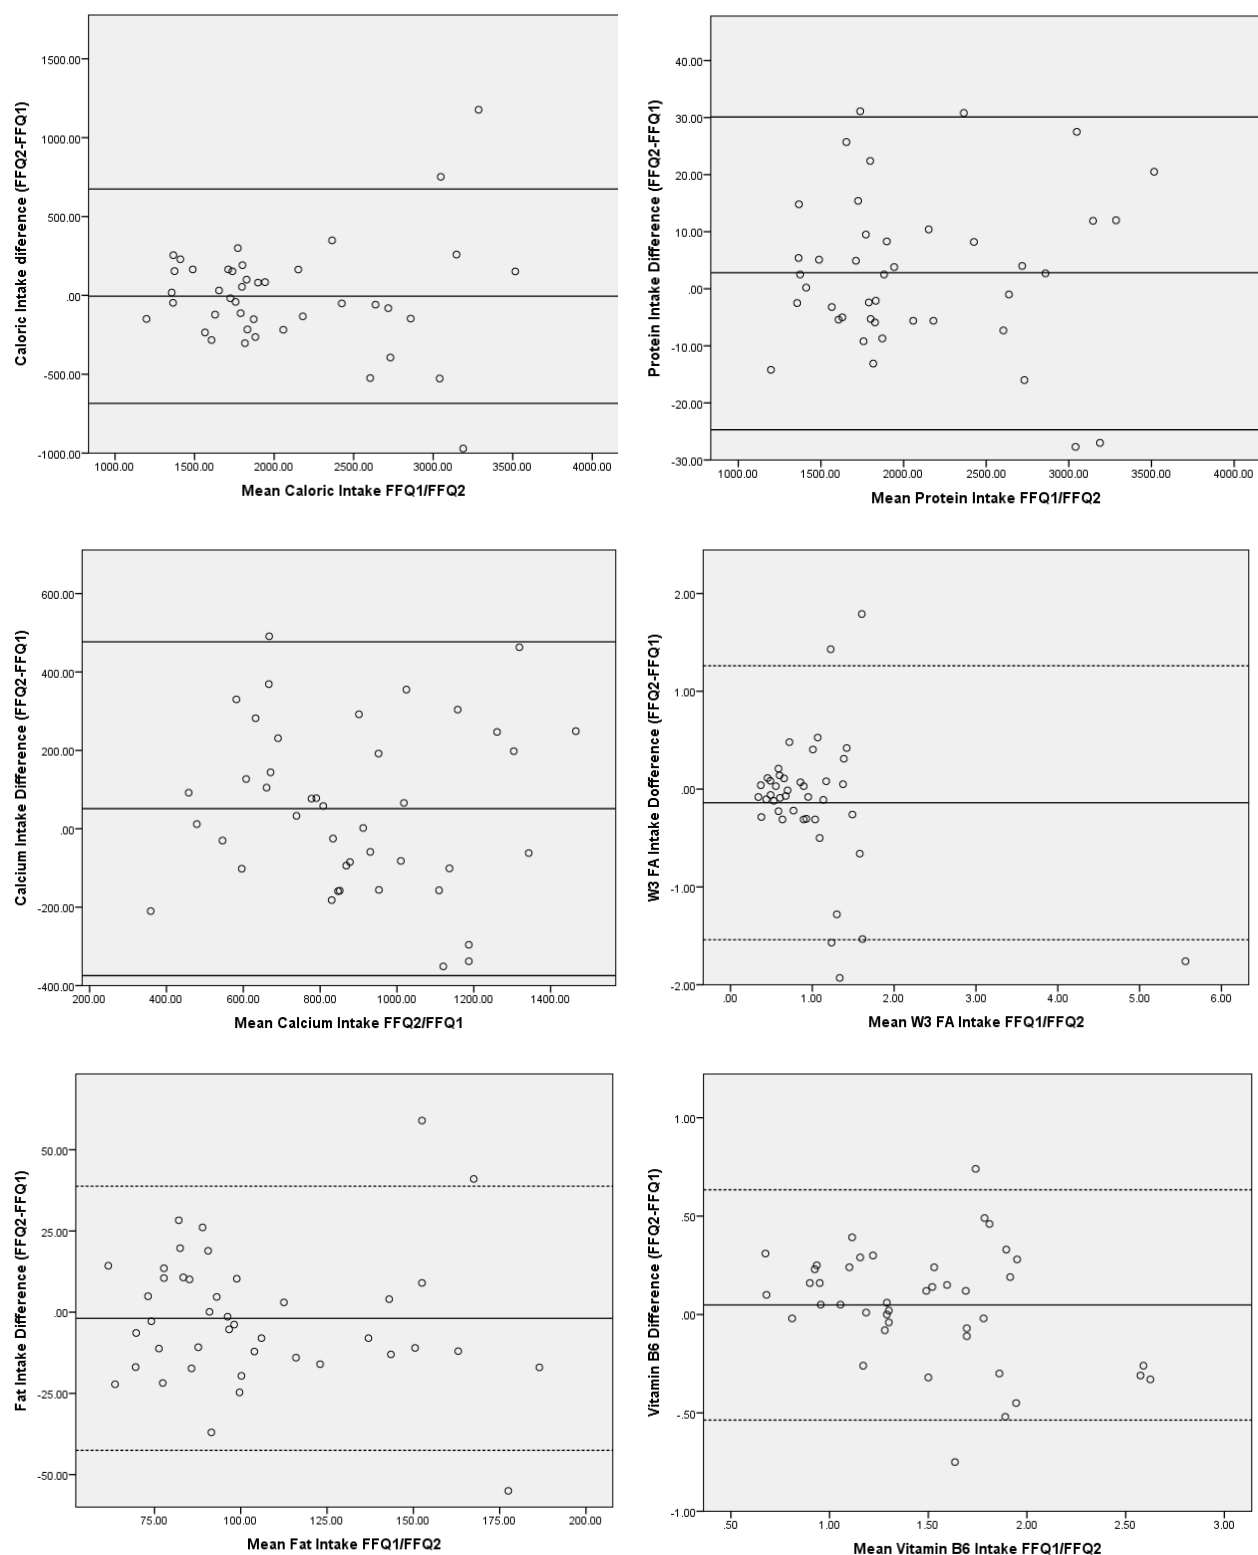

Figure S1. Bland–Altman plots showing agreement between estimated nutrient intakes (FFQ2 – FFQ1) against mean FFQ1/FFQ2 for (A) caloric intake (Calories/day), (B) protein (g/day), (C) fat (g/day) and (D) calcium (mg/day), (E) omega 3 fatty acid (g/day), (F) vitamin B6 (mg/day). (—)Lines represent mean difference and (- -) represent lower and upper 95% limits of agreement.
