

Figure S2

Figure S2: The expression of STK3 demonstrate positive expression with YAP1 signature. In TCGA cohort, the top 10% STK3 high expression cases demonstrate positive correlation with **a** YAP1 up, **b** YAP1 conserved signature and **c** YAP1 downstream by GSEA analysis. **d** The heatmap of STK3 expression with YAP1 signature genes in TCGA cohort. **e** Knocking STK3 decreased some YAP1 target gene expression, such as CTGF, CDK1, and WNT5B.
