

Scientific Review Opinion Letter for Investigator-Initiated Clinical Research

Number: Scientific review 2025031

Study Name	A Cohort Study of New FIGO Staging for Prognostic Assessment in Patients With Endometrial Cancer				
Department	Clinical Medicine Center of Obstetrics and Gynecology	Principal Investigator	Ye Yang	Review Date	2025-03-21
Review Category	: ☒ Initial Review ☐ Major Amendment Review				
Review Type	: ☒ Expedited Review ☐ Record Filing ☐ Panel Review ☐ Emergency Panel Review				
Review Outcome	Submitted Documents: ☒ Research Protocol (Version: 4.0; Version Date: 2025-02-09) Conclusion: ☒ Approved ☐ Approved with Modifications ☐ Resubmission Required ☐ Not Approved				
Review Comments	The Scientific Review Committee provides the following review opinions and suggestions regarding the research protocol: Approved. Clinical Research Center (Seal): Date: 2025-03-21 				

Notes:

1. For 'Approved' research, modifications should be made according to the review opinions and the revised research protocol should be promptly submitted for ethical review.
2. For 'Not Approved' research protocols, revisions should be made based on the review opinions and resubmitted for review.
3. During the research process, if there are significant modifications to the research protocol or other important information, a new scientific review must be conducted and approved before submission for ethical review.
