

Table. Some of the medical equipment provided by MCAI on behalf of the partnership

Cooper surgical and Kiwi (Laborie) vacuum delivery kits	Pulse oximeters (Zug medical)
Portable obstetric ultrasound scanners (PUM)	Obstetric forceps
Surgical headlight torches	Nurse fob watches
Contactless thermometers (Thermoflash)	Skin to skin wraps
3-way oxygen splitters	Neonatal resuscitaires
Response FC biochemistry analysis machines	Air conditioners
Paediatric stethoscopes (Littmann)	Delivery beds
Nasal CPAP systems (Diamedica)	Intensive care beds
Major oxygen generator system for Phebe Hospital	Caesarean section delivery sets
UPS systems	Laparotomy instrument sets
Doppler ultrasound fetal heart rate monitors	Patella hammers for eclampsia management
Oxygen concentrators	8 anti-shock garments
Small oxygen storage systems based on oxygen concentrators	APEC BP monitors
IV drip stands	Ellavi Uterine tamponade devices
IPAD tablets	Low reading thermometers
Bed mattresses	Samsung computer tablets
Spinal needles	Chromebooks
Surge protectors	iPhones
Blood glucose monitors	
Urine testing sticks (multi-test) Durbin	

ABOVE; A physician, logistician, Liberian obstetrician and trainer with two obstetric clinicians receiving a new portable ultrasound scanner for advanced obstetric care of pregnant women provided to CB Dunbar Hospital. Similar scanners were provided to Redemption, Martha Tubman Memorial, Fishtown, FJ Grant, Bong Mines and CH Rennie Hospitals and Sinje and Saclapea CEmONC facilities.

ABOVE: Because of the unreliability of electrically powered oxygen supply systems (oxygen concentrators), during the Ebola outbreak, MCAI provided an oxygen generator system based at Phebe Hospital that produces large cylinders full of medical grade oxygen for 4 nearby hospitals, including CB Dunbar Hospital

ABOVE: The respiratory support system, non-invasive nasal CPAP, provided for the care of newborn infants with respiratory failure.
