

A**B**

Additional Figure S1. Venn-diagrams of DEGs modulated by guadecitabine treatment in GBM, MM-BM and MM cell lines. Venn-diagrams illustrate the overlaps of the statistically significant (p -value <0.05) DEGs (p -value <0.05) **A** up- or **B** down-regulated by guadecitabine treatment in all investigated GBM, MM-BM and MM cell lines.
