

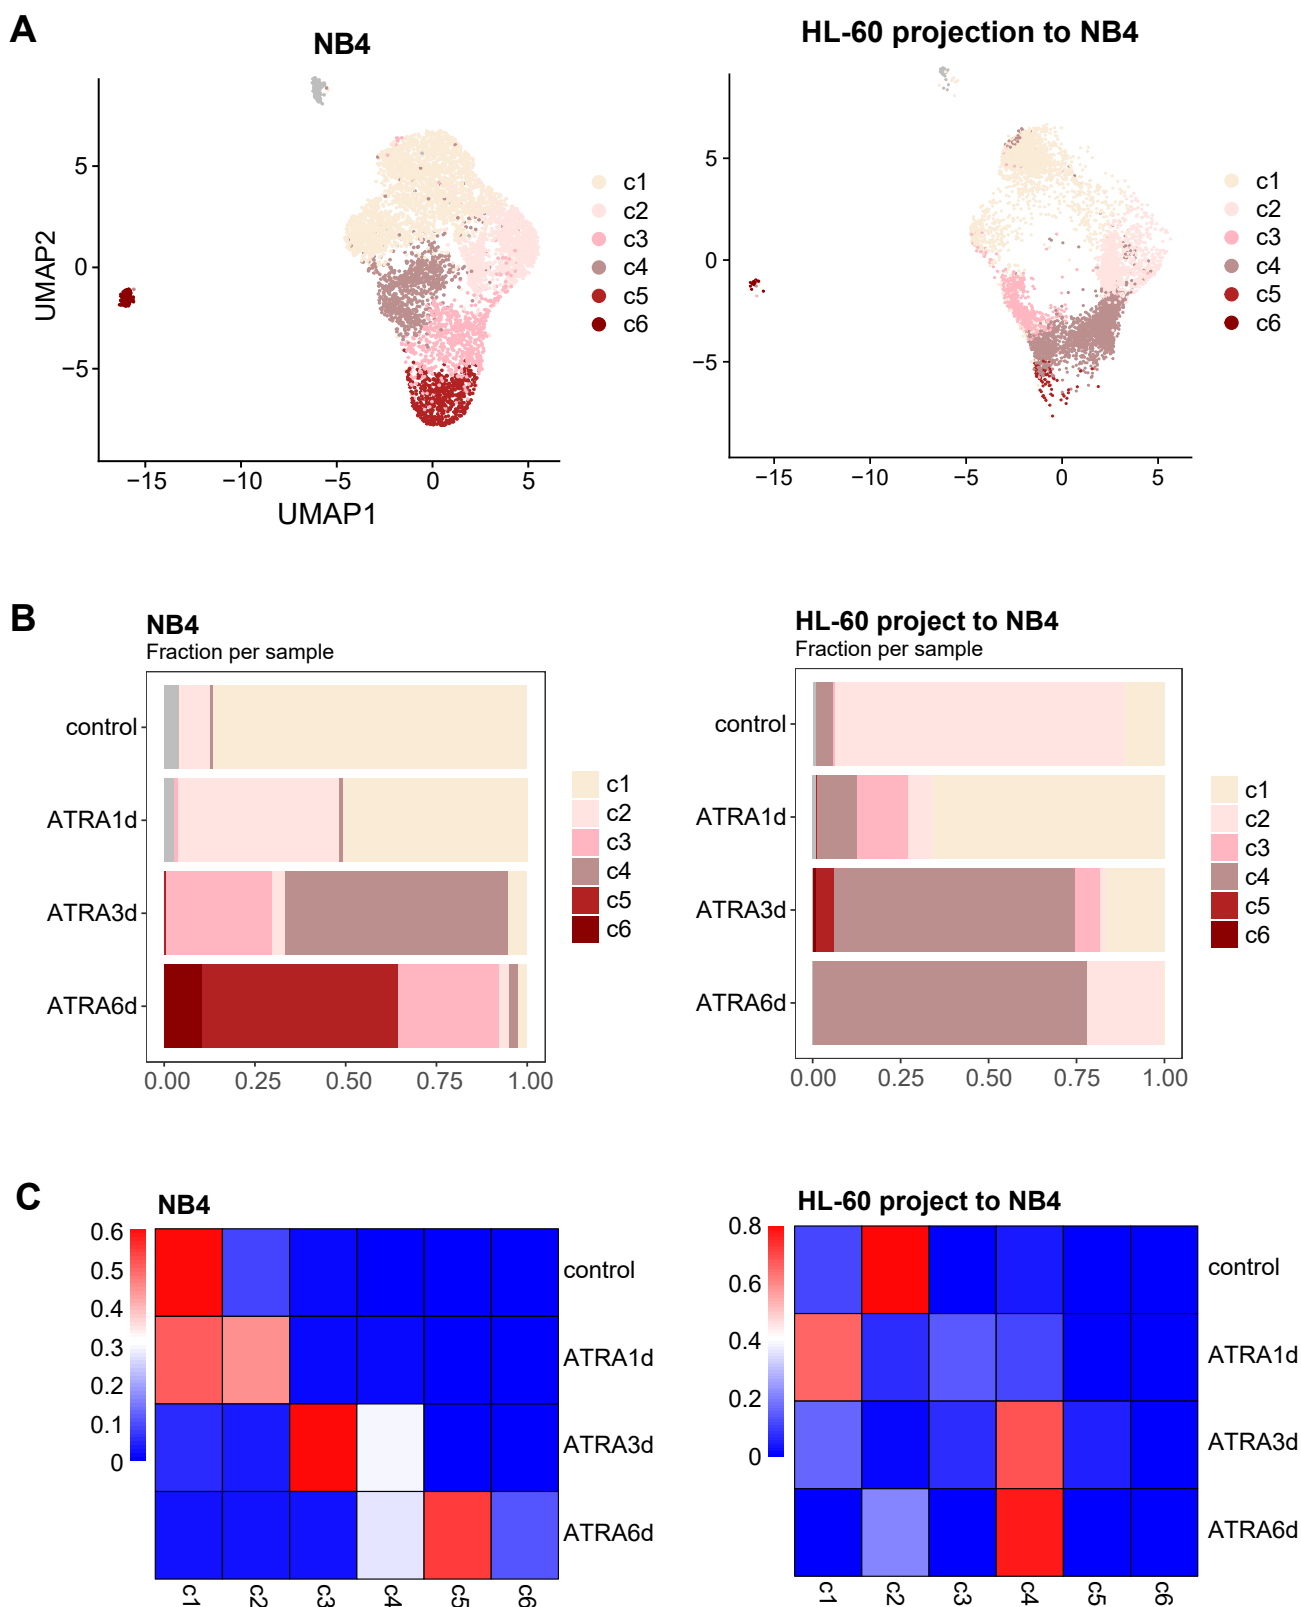

Figure S2. Projection analysis of HL-60 cells to NB4-differentiation trajectory.

- A. UMAP plot of NB4 (left) and HL-60-projected cells (right). The colors represented different clusters. The clusters were sorted according to the stages of differentiation. C5 and C6 represented the terminal differentiation state.
- B. Fraction plots of NB4 and HL-60-projected cells at every cluster.
- C. Heatmaps of NB4 and HL-60-projected cells at every cluster.
