

Additional file 2: Figure S2. Immunofluorescence staining of HMGB1 in the DRG at the L5 spinal level 5 h (A) or 8 days (B) after oxaliplatin (OHP) treatment in mice. Mice received i.p. administration of OHP at 5 mg/kg or vehicle (V). Nuclei were stained with H333342 (blue), and HMGB1 were stained with an anti-HMGB1 chicken polyclonal antibody (red). Control, chicken IgY; Scale bar, 50 μ m.
