

Supplementary Figure 3

Supplementary Figure 3. Immunohistochemical analysis of astrocytes. Sections from the hippocampus (A, B, C, and D, respectively), cortex (E, F, G, and H, respectively) and cerebellum (I, J, K, and L, respectively) of 2.5- and 4.5-month-old *WT* and *Hexa*^{-/-}*Neu3*^{-/-} mice were labeled with anti-GFAP antibody (red) and DAPI (blue) to detect astrogliosis. Scale bar = 50 μ m.
