

Supplementary Figure 1. Application to a mouse strain with markedly smaller lateral ventricles (BALB/c).

A. Example ultra-long TE T2w image from a C57BL/6 mouse. B. Associated manual segmentation of the image shown in (A). C,D: Example equivalent images taken from two example BALB/c mice when the ChP tissue can no longer be identified. E. Histology confirming presence of ChP tissue in BALB/c mouse.
