Supplementary table. Association of access to TV, access to radio, and ownership of mobile phone with quintile of wealth status						
	1st quintile (poorest) n=2653	2nd quintile n=2799	3rd quintile n=2727	4th quintile n=2238	5th quintile (richest) n=1575	Total n=11992
*Access to TV						
No	2648 (99.8%)	2758 (98.5%)	2528 (92.7%)	1787 (79.8%)	856 (54.3%)	10577 (88.2%)
Yes	5 (0.2%)	41 (1.5%)	199 (7.3%)	451 (20.2%)	719 (45.7%)	1415 (11.8%)
*Access to radio						
No	2604 (98.1%)	2670 (95.4%)	2560 (93.9%)	2074 (92.7%)	1429 (90.7%)	11337 (94.5%)
Yes	49 (1.9%)	129 (4.6%)	167 (6.1%)	164 (7.3%)	146 (9.3%)	655 (5.5%)
*Ownership of mobile phone						
No	2280 (85.9%)	2082 (74.4%)	1791 (65.7%)	1190 (53.2%)	506 (32.1%)	7849 (65.5%)
Yes	373 (14.1%)	717 (25.6%)	936 (34.3%)	1048 (46.8%)	1069 (67.9%)	4143 (34.5%)
*p-value < 0.001 P-values were obtained by chi square tests. Wealth status has been used as a proxy for overall household wellbeing status, assuming better health with higher wealth status.
