

Additional file 3: Dose parameters for the target volumes (A, B) and the organs at risk (C-F) with median values (black crosses) sorted by the four different treatment planning strategies and the location of the tumor (blue: pancreatic head; orange: pancreatic body). Dose constraints are marked with dashed lines. (Abbreviations: D_{mean} : mean dose; D_{max} : maximum dose; $V_{x\text{Gy}}$: volume receiving x-Gy; $D_{2\%}$: near dose maximum, dose received by 2% of the volume; $D_{95\%}$: dose received by 95% of the volume).
