

Supplement Figure 3

Figure S3. Conditioned culture medium (CM) from TRAMP-C2-sMICB (TC2-sMICB) cells induce expansion of MDSC *in vivo*. B6 mice were injected i.p. with 200 μ l of control serum-free culture media, conditioned media collected from TRAMP-C2 mouse prostate tumor cells with expression vector control (TC2-Vector), or conditioned media collected from TC2-sMICB cells at Day 1 and Day 3. Mice were sacrificed at day 6. PEC were collected and analyzed for the MDSC. Data represent 5 animals in each experiment. The experiment were repeated 3 times and consistent results were obtained.
