

cPOCs specific GO	Overlapping GO	mPOCs specific GO
Ubiquitine ligase complex	Nuclear speck	Extracellular matrix
Autophagosome organization	DNA-binding transcription repressor	Collagen
	Ubiquitin-protein transferase	Extracellular matrix organization
	Histone modifying activity	Collagen fibril organization
	Aminoacyl-transferase activity	Basement membrane

mPOCs specific GO	Overlapping GO	cPOCs specific GO
Angiogenesis	Mitotic cell cycle phase transition	DNA replication
Epithelium migration	Cell cycle checkpoint signaling	Mitotic spindle
Cell-cell junction	DNA replication	Regulation of fatty acid transport
Focal adhesion	Sister chromatid segregation	Positive regulation of protein Ser/Thr kinase activity
Cell-substrate adhesion	Organelle fission
