

On scene:

ASSESS THE PATIENT'S CONDITION AND ANAMNESTIC DATA

Consider ECMO

Witness collapse
PRESUMED CARDIAC CAUSE

Bystander CPR
Performed before EMS arrival

Circulatory arrest or **+ HYPOTERMIA**
Risky of arrest

intoxication
Betablockers etc

Exclude ECMO

AGE > 70 years

childrens Less than < 15 KG

TERMINAL conditions
Malignant disease

TERMINAL conditions
Chronic, irreversible disease

On scene:

ADVANCED LIFE SUPPORT
SYMPTOMATIC THERAPY
MECHANICAL chest compressions (LUCAS)

CONSIDER ECMO

Up to 10 minutes of ALS

OR

After third defibrillation

- ROSC with circulatory instability
- Without ROSC with ongoing CPR during transport

ECMO phone 24/7

703433383

TRANSPORT TO EMERGENCY
