

PROVIDER SURVEY:

Dear Patient Provider,

You are receiving this survey because one or more of your patients were enrolled in the Germline genetic Testing in Advanced Cancer (GTAC) study. As you are aware, patients with advanced cancer underwent testing first and only those with positive test results went on to receive counseling with our genetics team. As part of this study, we are surveying providers to assess satisfaction with the new counseling process tested in this study. We appreciate your participation and feedback. Results from this study will help us improve our current genetic testing model for patients with cancer.

1. How many patients did you refer to GTAC? Not sure, 0-5, 5-10, 10-15
2. How many patients had a positive test result? Not sure, 0-5, 5-10, 10-15

Please indicate whether you agree or disagree with the following statements: (Strongly agree, agree, unsure, disagree, strongly disagree)

3. I was satisfied with the process of testing patients first and counseling only those that are positive.
4. Genetic testing for my patients is easier under the new process than the old process (referral for counseling).
5. If I had questions about the test first process, I would know who to ask.
6. The new process facilitated getting genetic testing results in a timelier fashion than previously.
7. The genetic test results to help make decisions for treatment
8. The genetic test results to change cancer screening for my patients
9. For those who patients who tested positive, I was comfortable recommending testing for their relatives.
10. Participation in this study increased my willingness to order genetic testing for my patients.
11. I would like for this process of genetic testing to continue to be available for patients with advanced cancer.
12. I would be interested in expanding this process of genetic testing as an option for all patients with cancer.
13. Please describe anything that you liked about the new process.
14. Please describe anything that you did not like about the new process.
