

Correlation between expression of selected genes

Supplemental Figure 4: Correlation between top 3% most variant genes in comparison groups.

Normalized expression mean of Non-carrier E+P (N=4) vs BRCA1^{mut} E+P (N=4), Non-carrier E+ P (N=4) vs Non-carrier+TPA (N=4), BRCA1^{mut} E+P (N=4) vs BRCA1^{mut} + TPA (N=4).
