

Supplementary material online

Supplementary figure legends:

Figure S1. Changes in tumour levels of: Ki67 (A), Oestrogen receptor (B) and Progesterone receptor (C) before and after NET.

Figure S2. Association between tumour cellularity size (A), tumour cellularity (B) and pathological tumour size (C) with Ki67 levels at surgery. Spearman correlation coefficients (ρ) and p values are shown.

Figure S3. Comparison of TCS quartiles (Q1, Q2, Q3 and Q4) with Ki67 levels at surgery (A) and Δ Ki67 (B). p values were calculated using Mann Whitney test.
