

Copy number variation analysis of the *TERT* gene in the CRISPR-edited clones.

Copy number of the *TERT* gene in (A) HEK 293 clones with FLAG-SNAP-TERT, (B) HEK 293T clones with modified *TERT* promoter, and (C) SCaBER clones with modified *TERT* promoter were performed as described in Materials and Methods with the *GAPDH* gene or the *TBP* gene as internal control. In (B), Clone 1 and 2 have lost a copy of the *TERT* gene. Clone 3 and 4 correspond to the clones analysed in Fig S6F.
