

Additional file 15: Table S7: Tenfold cross-validation
performance of best linear model and neural net

Model	ROC AUC*
Best additive model	0.735 (0.00206)
NN _{biosparse}	0.760 (0.00567)

* Performance given as mean (standard deviation) of test set ROC AUC from 10 different full tenfold cross-validation runs with the same fold splits for all models.
