

Table S1. Number of analyzed cells per sample and technology.

Sample ID	SnRNA-seq	RNAscope	Visium^{a)}	MC	Merscope	Xenium
MB263	2701	–	1977	32106	–	83174
MB266	2246	25977	2782	34625	61514	125056
MB295	3726	72700	2490	40816	78402	181935
MB299	5009	48677	2660	30962	–	262161

Each sample listed was run once on the indicated platform.

^a For Visium, the number corresponds to the spots under the tissue with each spot comprising RNA from several cells due to the limited resolution.
