

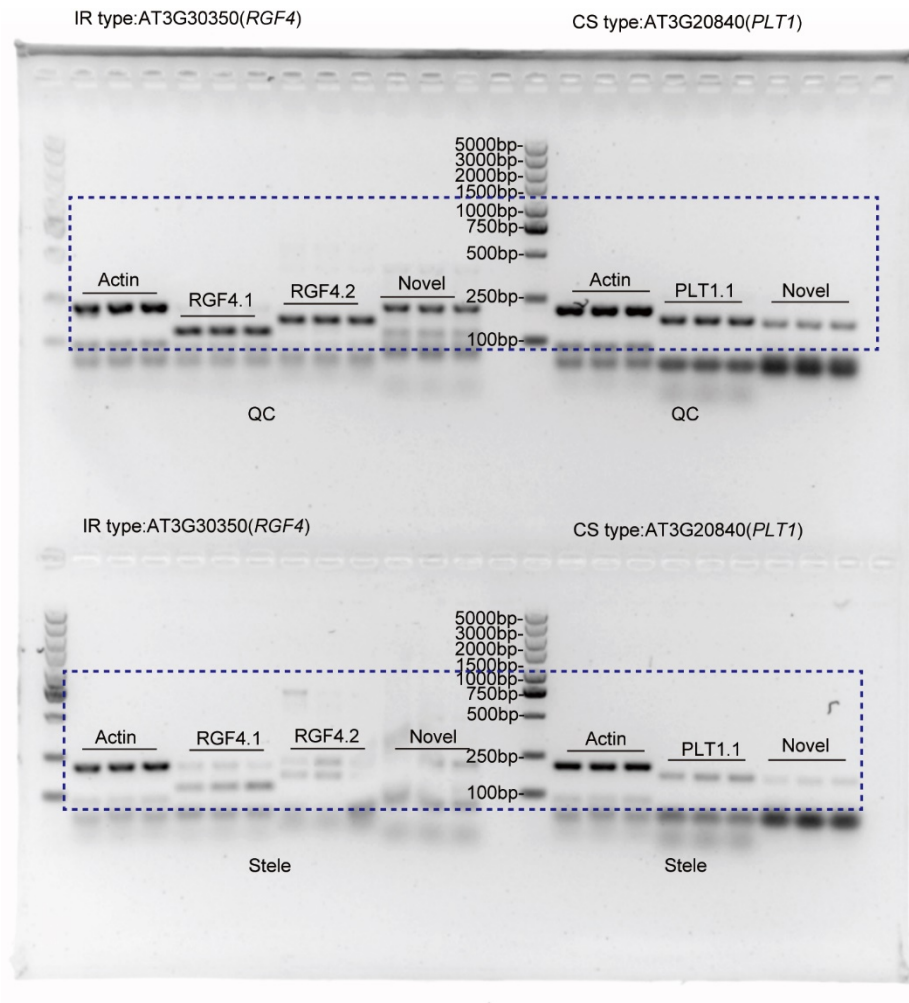

Fig. S1. Abundance of IR-type and CS-type novel transcripts of *RGF4* in QC and stele from gel electrophoresis assay. The dashed boxes indicated cropped regions. Related to (Additional file 1: Fig. S6a-b)

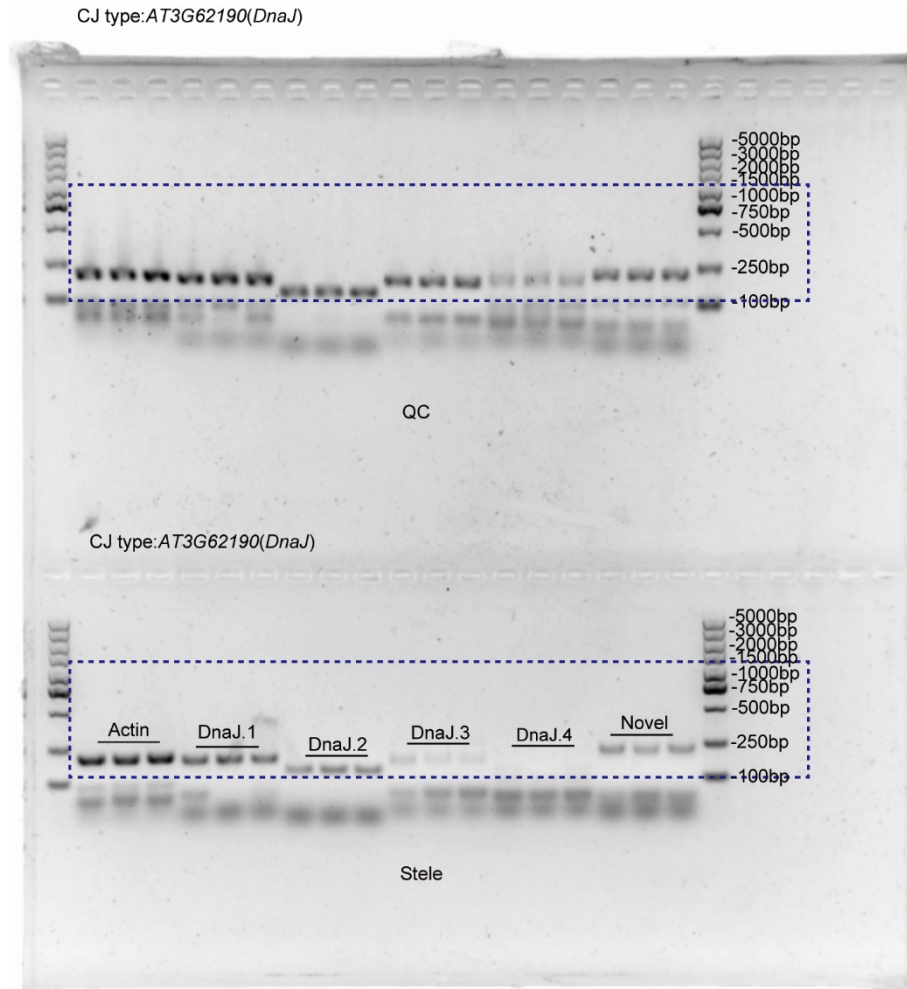

Fig. S2. Abundance of CJ-type novel transcripts of *DnaJ* in QC and stele from gel electrophoresis assay. The dashed boxes indicated cropped regions. Related to (Additional file 1: Fig. S6c)

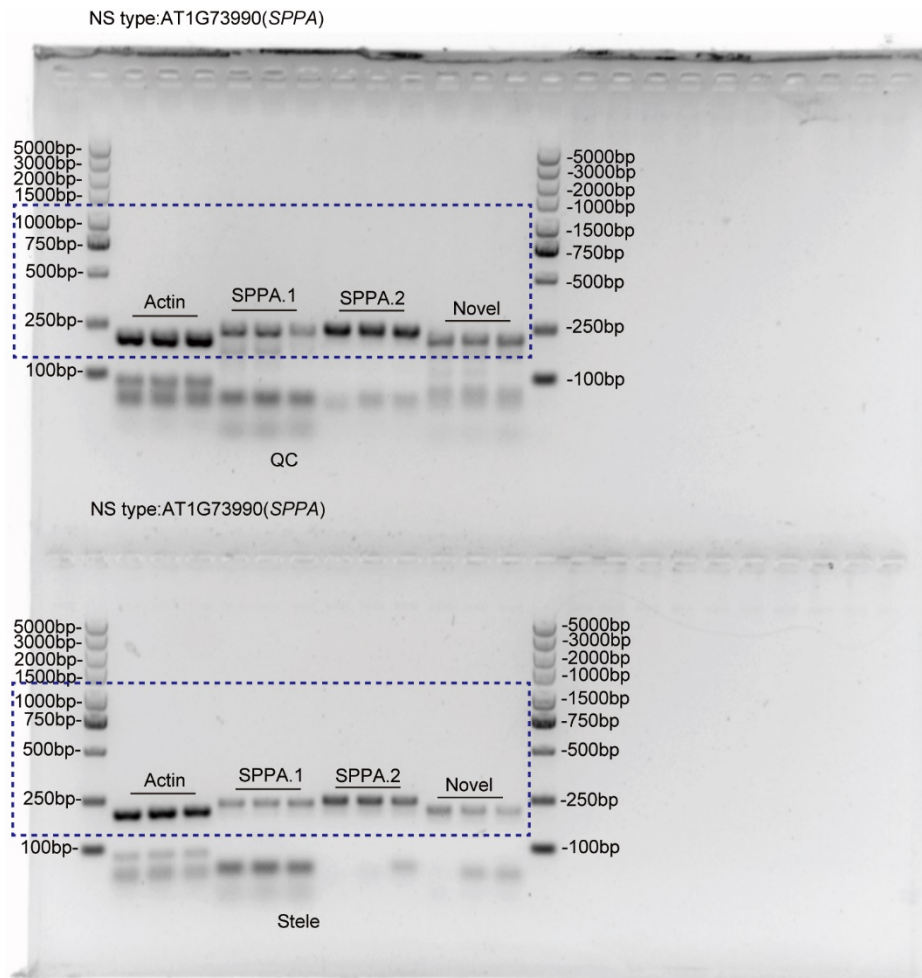

Fig. S3. Abundance of NS-type novel transcripts of *SPPA* in QC and stele from gel electrophoresis assay. The dashed boxes indicated cropped regions. Related to (Additional file 1: Fig. S6d)

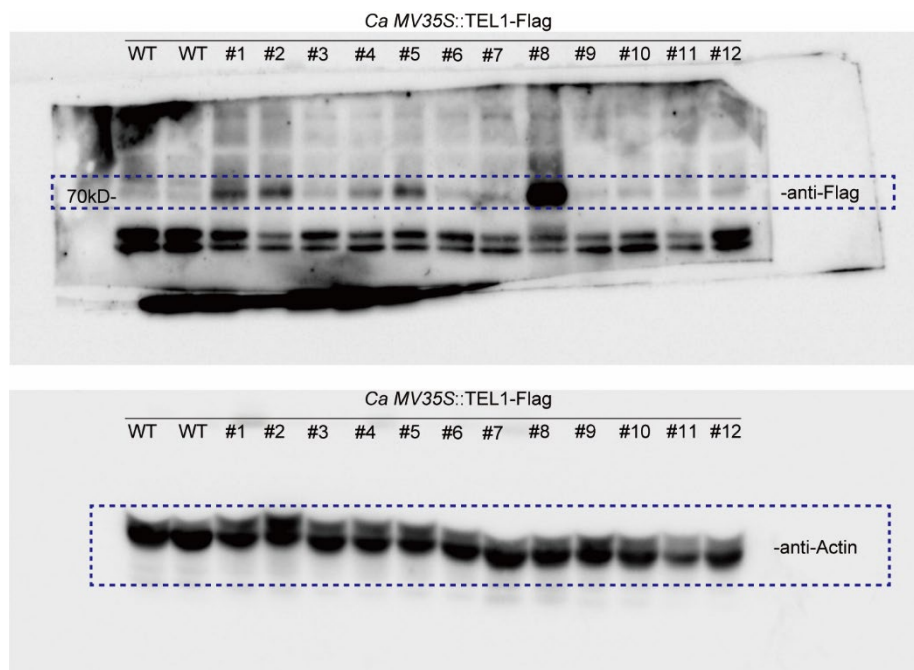

Fig. S4. Immunoblot analysis showing TEL1 protein expression in *TEL1-OE* lines (35S::TEL1-Flag) at 5 DAG. The dashed boxes indicated cropped regions. Related to (Additional file 1: Fig. S14f)
