

Figure S1. Distributions of the normalized log2 transformed read count of all biological replicates. **A:** Box plot showing the mean and the range of the read count of the genes. **B:** Density plot showing distributions of log2 read count of the genes. **Liq:** Liquid cultivation on malt extract for 10 days. **Day4:** Solid-state cultivation on wheat straw for 4 days after liquid cultivation on malt extract for 6 days. **Day10:** Solid-state cultivation on wheat straw for 10 days after liquid cultivation on malt extract for 6 days. **Day15:** Solid-state cultivation on wheat straw for 15 days after liquid cultivation on malt extract for 6 days.
