

Table S6. Autogeny according to *Cx. pipiens* form*

	ID 8 (above)		ID 11 (under)	
	autogenous	anautogenous	autogenous	anautogenous
<i>Cx. p. pipiens</i>	3 (13.63)	6 (31.58)	1 (2.78)	0 (0)
<i>Cx. p. molestus</i>	11 (50)	5 (26.32)	19 (52.78)	8 (61.54)
Hybrid	8 (36.36)	8 (42.11)	16 (44.44)	5 (38.46)
Analyzed female	22	19	36	13
		41		49
Died female		19		8

Values in parenthesis refer to the percentage within each form.

*Values in table represent a total of 3 replicates

Description of data

These data show the expression of autogeny according to *Cx. pipiens* form in above and under-ground sites. This test was replicated three times (once a month). In all, we started with 60 couples from ID8 and 57 from ID11 and at the end of the test; we used molecular analysis only for the survived females (n=41 for ID8; n=49 for ID11). These data represent the total of three replicates.
