

Table S8. Nucleotide variants in 714 bp of the Acetylcholine esterase 2 gene in *Cx. pipiens*

Accession N°	<i>Cx. pipiens</i> form	Ace 2 gene position	
		180	267
[AY196910.1]	<i>Cx. pipiens</i>	C	G
[JF430595.1]	<i>Cx. pipiens pipiens</i>	C	T
[AB294405.1]	<i>Cx. pipiens molestus</i>	G	G

Description of data

These data represent the differences in nucleotide sequences of the *Ace 2* gene of three *Cx. pipiens* forms previously described in the world, available in GenBank
