

G A A T G C T T C T G T

The image displays a DNA double helix structure. The top strand is composed of the bases G, A, A, T, G, C, T, T, C, T, G, T. The bottom strand is composed of the bases C, A, A, T, G, C, T, T, C, T, G, T. The bases are color-coded: G is yellow, A is green, T is red, and C is blue. The structure shows base pairing between the top and bottom strands, with the sequence G A A T G C T T C T G T on the top strand and C A A T G C T T C T G T on the bottom strand.
