

TGGGAATGTGTC

The image displays a DNA double helix structure. The top strand is composed of the following nucleotides: Thymine (red), Guanine (orange), Guanine (orange), Adenine (green), Adenine (green), Thymine (red), Guanine (orange), Thymine (red), Guanine (orange), and Cytosine (blue). The bottom strand is composed of the following nucleotides: Cytosine (green), Cytosine (orange), Adenine (red), Guanine (blue), Guanine (orange), Adenine (green), Guanine (blue), Cytosine (orange), Cytosine (green), and Guanine (blue). The sequence of the top strand is TGGGAATGTGTC.
