

Supplementary Figure S1: The distribution of plasmid Inc types carried by *Klebsiella pneumoniae* strains isolated from children with and without diarrhea, as well as the carriage rate of each type in the two groups on the right.

Supplementary Figure S2: The phylogenetic relationship of sequence type of *Klebsiella pneumoniae* strains isolated from children with and without diarrhea was investigated and performed using PHYLOViZ (<https://online.phyloviz.net/>).

Supplementary Table S1: The information of 52 *K. pneumoniae* sequenced in this study uploaded to GenBank under the project PRJNA1175053.

Supplementary Table S3: The Kappa index value which indicated the consistency between the resistance genotypes and phenotypes of each antibiotic in two group were calculated. The values of statistical significance were showed here.

Antibiotics	Children with diarrhea	Children without diarrhea
Amoxicillin/Clavulanate	1.000	0.885
Gentamicin	0.462	0.764
Tetracycline	0.906	0.898
Chloramphenicol	0.272	0.395
Trimethoprim/Sulfamethoxazole	0.381	0.293
