

Supplementary Figure and Figure Legend (by Huang, Yen et al.)

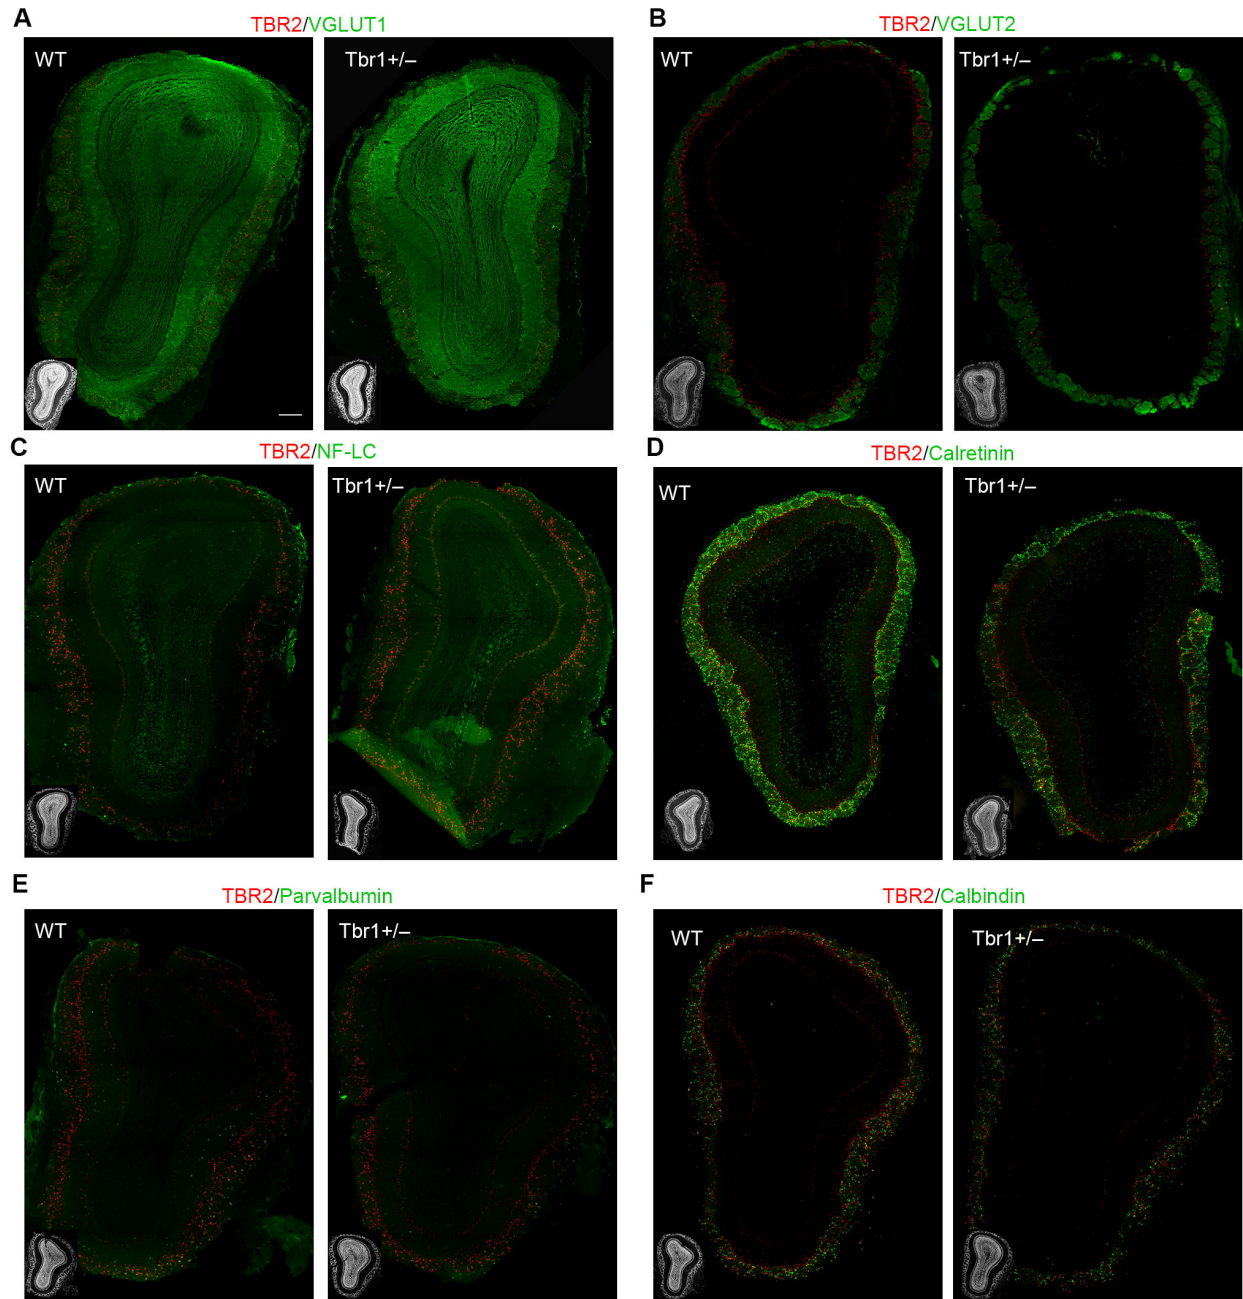

Figure S1. Entire images of olfactory bulbs shown in Figure 5.

Double immunostaining of TBR2 and (A) VGLUT1, (B) VGLUT2, (C) Neurofilament-light chain (NF-LC), (D) Calretinin, (E) Parvalbumin, and (F) Calbindin was performed to compare *Tbr1*^{+/-} and WT olfactory bulbs. Black and white images in the bottom-left corners of each entire image are DAPI staining results. Scale bars: 200 μ m.
