

**Hyperechoic mesenteric fat on preoperative intestinal ultrasound
predicts early postoperative recurrence in Crohn's disease**

ELECTRONIC SUPPLEMENTARY MATERIAL

Supplementary Table 1. Inter-observer agreement for the IUS parameters

Variables	Agreement level
	Kappa value or ICC
HMF	0.886#
BWT	0.905*
BWS	0.779#
Limberg classification	0.788#
Abscess/fistula	0.804#
Mesenteric lymphadenopathy	0.721#
Abdominal effusion	0.468#

HMF, hyperechoic mesenteric fat; BWT, bowel wall thickness; BWS, bowel wall stratification; # Data are presented with kappa value for categorical variables; * Data are presented with intraclass correlation coefficient (ICC) for continuous variables.
