

Fig. S1 Effect of SKP-SC-EVs on DRG axonal outgrowth. **(A)** Representative images of DRG explants in different EVs concentration groups. Scale bar, 500 μm. **(B)** Histograms showing the difference of axonal area among low-, medium-, and high-dose EVs groups and control group. $n = 4$; $*p < 0.05$, compared with control group; $###p < 0.001$ compared with low-dose EVs group.
