

Supplementary Figure 2

Fig. S2 Inhibitors targeted FBF1 mediated signaling pathway can rescue FBF1-induced stem cell-like properties *in vitro*. (A, B) Sphere formation ability is identified. Scale bars: 100 μ m. (C-F) Cell migration abilities and invasion properties are detected. Scale bars: 100 μ m. (G, H) Western blot showed the expression of FBF1, p-PI3K, p-AKT, E-cadherin and stemness markers.
