

Score	Criteria
Exocrine pancreas	
0	No pathological changes observed
1	Necrosis of exocrine pancreas, affecting up to 50% of exocrine tissues in the section
2	Necrosis of exocrine tissue affecting more than 50% of exocrine tissue in the section.
3	Absent of exocrine pancreatic tissue
Myocardial degeneration and inflammation	
0	No pathological changes observed
1	Focal myocardial degeneration and inflammation
2	Multifocal myocardial degeneration and inflammation
3	Extensive myocardial degeneration and inflammation (panmyocarditis)
Acute myocardial necrosis	
0	No pathological changes observed
1	Observed acute myocardial necrosis <10
2	Sporadic acute myocardial necrosis 10-50
3	Massive acute myocardial necrosis >50
Epicarditis	
0	No pathological changes observed
1	Sparse infiltration of inflammation cells in epicard
2	Moderate infiltration of inflammation cells in epicard, <3 layers
3	Extensive infiltration of inflammation cells in epicard >3 layers
Muscle lesion	
0	No pathological changes observed
1	Focal myocytic degeneration and inflammation
2	Multifocal myocytic degeneration and inflammation
3	Extensive myocytic degeneration and inflammation
