

Supplementary Figures

Figure S1. GC/MS profiles of MM supplemented with λ -Cyhalothrin after incubation for 24 h at 150 rpm and 37°C. A) GC/MS spectrum of control (non-inoculated MM+100mg/L λ -Cyhalothrin). B) GC/MS spectrum of MM+100mg/L λ -Cyhalothrin inoculated with 4B. C) GC/MS spectrum of MM+100mg/L λ -Cyhalothrin inoculated with 5A. D) GC/MS spectrum of MM+100mg/L λ -Cyhalothrin inoculated with 7A. E) GC/MS spectrum of MM+100mg/L λ -Cyhalothrin inoculated with 11B. F) GC/MS spectrum of MM+100mg/L λ -Cyhalothrin inoculated with AHB. The numbers refer to the compounds in table2.
