

Supplementary Figure 4. G4access profiling in WRN-depleted Hela cells (siWRN). Unprocessed data were retrieved from GEO (GSE187007) and displayed in IGB. Genomic regions at *INPPL1* (SHIP2) and *MYC* were shown. The *MYC* promoter contains a G4 sequence that is known target of WRN. Genomic regions with increased G4 peaks were highlighted with asterisks.
