

Data extraction form_Emootional support

Data Extraction Form-Emotional support

Study characteristics

1. Initial of person entering data (including middle names, if applicable)

[Examples are: Rashmi Devkota= RD]

2. First Author

[Enter as: last name, first name]

3. Year of publication and data collection

4. Publication type

[Examples: Journal, thesis, reports. For journals, state name of the journal]

5. Country of origin of study

6. Title of the study

[Copy paste the title from the article]

7. Research aim/question

[Extract the author's stated primary and secondary purposes]

8. Theoretical framework

[Just the name of the theoretical framework. No further details required]

Study design

Study design

9. Select the applicable study design

Mark only one oval.

- ☐ RCT *Skip to question 12*
- ☐ Controlled trial *Skip to question 12*
- ☐ Pre-Post *Skip to question 12*
- ☐ Cohort *Skip to question 12*
- ☐ Case-control *Skip to question 12*
- ☐ Cross-sectional *Skip to question 12*
- ☐ Qualitative *Skip to question 12*
- ☐ Mixed *Skip to question 10*
- ☐ Others *Skip to question 11*

Specify mixed design

10. If mixed design, select the most appropriate designs from the following list

Mark only one oval.

- ☐ Exploratory sequential design-study begins with qualitative data collection methods followed by quantitative methods
- ☐ Explanatory sequential design - study begins with quantitative methods followed by qualitative methods
- ☐ Concurrent- both quantitative and qualitative methods are conducted in parallel

Skip to question 12

Specify other types of designs

11. If other designs, provide descriptions

Methods of data collection

12. Method of data collection-Quantitative

Check all that apply.

- ☐ Participant completed survey/questionnaire
- ☐ Researcher completed survey/questionnaire with participant/structured participant interview
- ☐ Administrative data review/structured chart review
- ☐ N/A
- ☐ Other: _____

13. Method of data collection-Qualitative

Check all that apply.

- ☐ Semi-structured interview
- ☐ Focus group discussions
- ☐ N/A
- ☐ Other: _____

Settings

[Refers to the settings from which participants were recruited from

14. Setting reported in the study

Sample and sampling methods

15. Sample size

16. Sampling method used

[e.g., random sampling, purposive sampling, stratified sampling]

17. Age

[Extract the average (mean or median) age, the percentage of older adults in different age categories identified in the article. If the study includes both young and older population, report the age of older adults only]

18. Sex

[Extract the percentage of the sample that was female/women and/or male/men. If the study includes both young and older population, report sex of older adults only]

Outcomes and measures used**19. Outcomes reported in the study and the measures used to assess those outcomes**

[E.g., outcomes=emotional/informational support, measures used=MOS-SSS scale. Write the full form of the scale or instrument used]

20. Types of emotional support assessed and measures used

Analysis applied-Quantitative

21. Analysis-Quantitative

[Specify the analysis. No description needed]

Analysis applied-Qualitative

22. Analysis-Qualitative

[Specify the analysis. No description needed]

Analysis applied-Mixed method

23. Analysis-Mixed method

[Specify the analysis. No description needed]

Main findings

24. Findings

[Extract the factors that are found to influence older adults' emotional support under three different categories: individual (e.g., age, sex, race/ethnicity), relationship (e.g., social network), community and society (e.g., availability of community support group, ageism). For quantitative studies, report the statistically significant positive and negative associations and non-significant associations. For qualitative studies, key themes and factors assessed]
