

SUPPLEMENTARY/ADDITIONAL FILES

Supplementary Table 1. Quality Assessment Framework

Criterion	Description
1	Were the research objectives or aims clearly stated?
2	Was the study design clearly described?
3	Was the study population adequately described?
4	Were the eligibility criteria specified?
5	Was the sampling methodology appropriately described?
6	Was the sample size used justified?
7	Did the method description enable accurate replication of the measurement procedures?
8	Was the equipment design and set up clearly described?
9	Were sensors used justified?
10	Was the signal/data handling described?
11	Were the main outcomes measured and the related calculations (if applicable) clearly described?
12	Were the main findings of the study stated?
13	Were the statistical tests clearly described and justified? Machine Learning
14	Were limitations of the study clearly described?
