

Ethical review opinions

Audit No. : KY 2022-006-001

Ethical Review Date:	2023.01.05
Name of the research project	Construction and implementation of peer narrative support model: Take cancer survivors returning to work
Undertaking unit:	Taizhou Second People's Hospital
project leader	Xue Ping, Que Wenqian / Medical School, Nantong University (School of Nursing)
Project start and end date	2023.01 --2024.6
Review method:	☐ Conference review of the ☒ rapid review
Main contents of human specimens involved: This topic selected 48 cancer survivors treated in Taizhou, Nantong A and SanB hospitals of Jiangsu Province as the subject and object of peer narrative support. The partner received 30-40 minutes of training once a week in 2 months. Support the host and object parties to participate in 15-20 minutes of online peer narrative activities once a week within 3 months. In the process of action, the researchers adopted the observation method and the focus group interview method to deeply understand the interaction between the two sides, communicate with the supporting subject and object in time, especially pay close attention to the real experience of cancer survivors, and collect questions and suggestions. Patients will be invited to fill out a questionnaire before and after the study covering general information, return to work adaptability, and social support. Secondly, patients will be invited to receive focus group interviews during the study, about 1-2 times, 30-45 minutes each. This project does not increase the pain and medical expenses of the subjects, its research materials and research results are used for scientific research purposes, and there is no benefit Benefit conflict.	
Review opinions: After the review of the Ethics Committee, the experimental design and protocol of the study gave full consideration to the safety and fairness principles, and the study content does not constitute the harm and risk of the subjects, the recruitment of subjects will be safe based on the principle of voluntary and informed consent, and protect the privacy of the subjects as much as	

possible. There is no conflict of interest in the study content and results. Agree to its declaration. After the project approval is successful, the application form will be submitted,

Protocol, informed consent form and other documents were resubmitted to the EC for re-review
