

(A)

All-adjusted Change in Preterm Birth Risk by IPI Relative to Reference

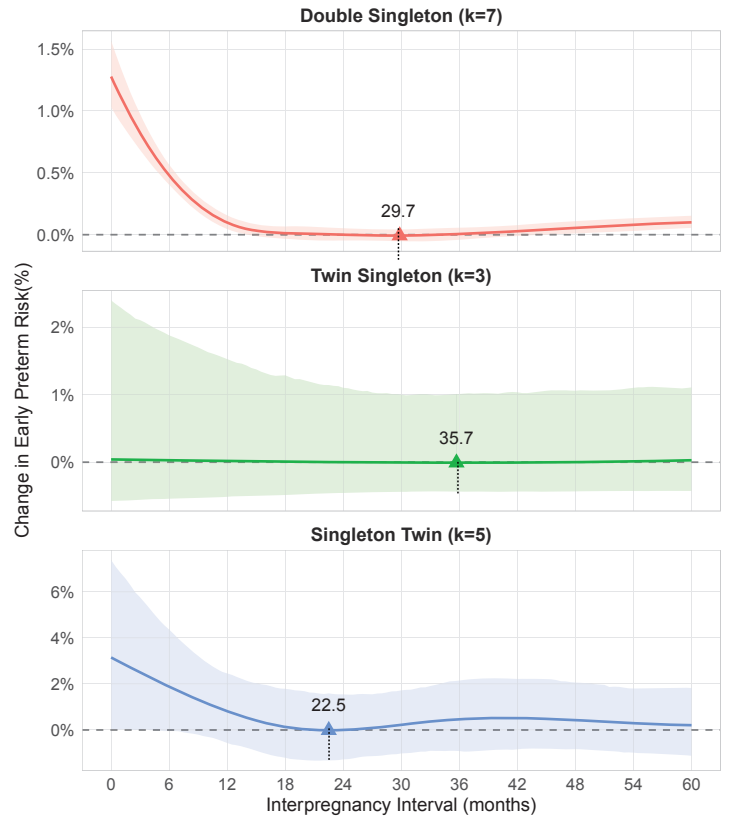

Reference IPI = 24 months | Shaded areas represent 95% confidence intervals

(B)

All-adjusted Change in Early Preterm Risk by IPI Relative to Reference

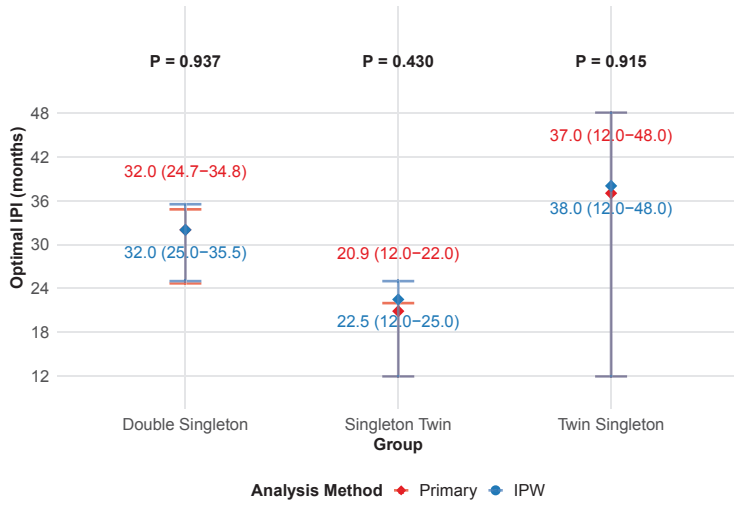

Reference IPI = 24 months | Shaded areas represent 95% confidence intervals

(C)

Comparison of Primary and IPW Analyses (All-adjusted for Preterm Risk)

Optimal IPI estimates with 95% confidence intervals

(D)

Comparison of Primary and IPW Analyses (All-adjusted for Early Preterm Risk)

Optimal IPI estimates with 95% confidence intervals
