U2932-R1

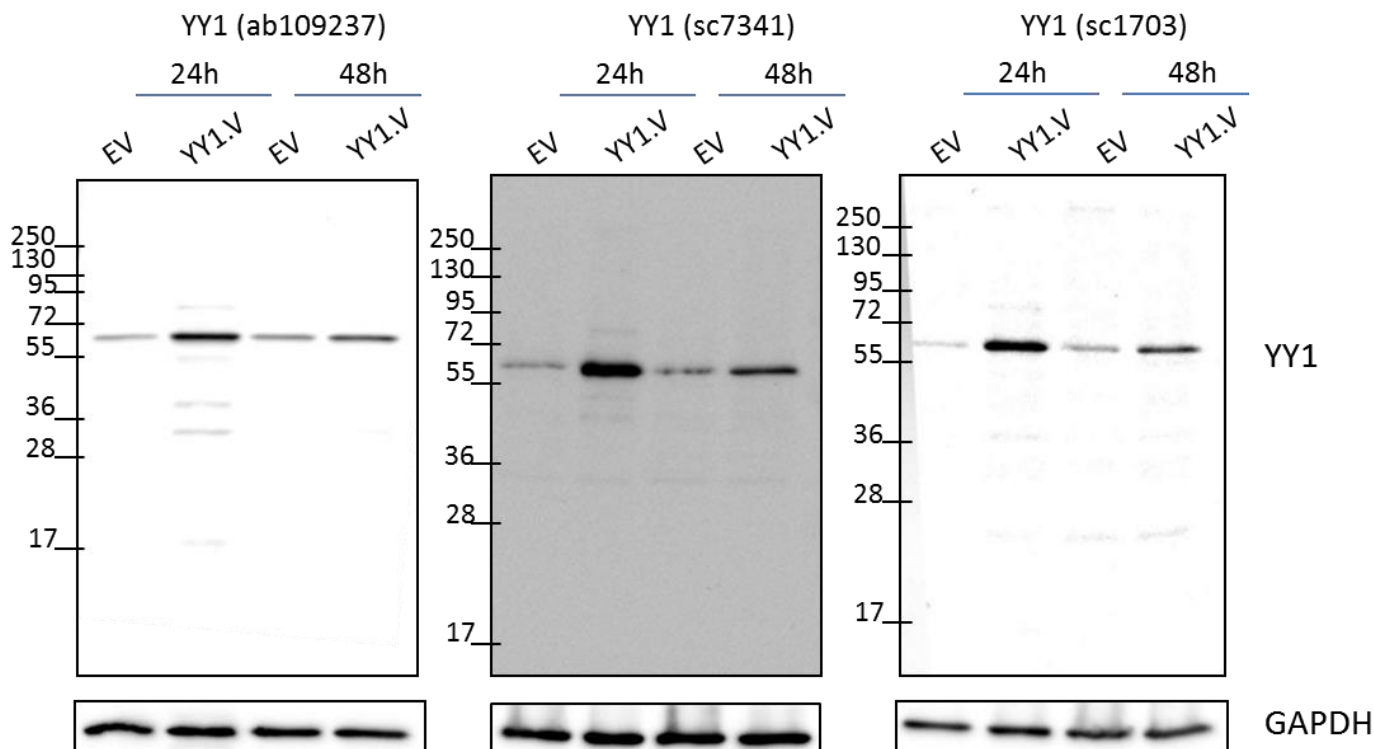

Figure S1

Confirmation of anti-YY1 antibody specificity. Detection of YY1 with three different commercial antibodies directed against YY1 by western blot in lysates from U2932-R1 cells nucleofected with YY1 expression vector (YY1.V) or its corresponding empty vector (EV) harvested 24 and 48h after transfection. The study-based anti-YY1 antibody (ab109237) and two other antibodies (sc7341 and sc1703) were tested. GAPDH served as loading control.
