

Table S7. Pearson correlation coefficient (r) for the association between the level of disease severity and the total number of non-redundant resistance (R) or susceptible (S) haplotypes in tested accessions

<i>M. oryzae</i> isolate	Disease severity ^a	No. of R haplotypes ^b	No. of S haplotypes ^b
D41-2	LT	-0.40 ***	0.39 ***
	DLA	-0.33 ***	0.28 ***
12YL-DL3-2	LT	-0.41 ***	0.41 ***
	DLA	-0.29 ***	0.36 ***

^a Lesion type (LT) and diseased leaf area (DLA) of accessions

^b Total number of non-redundant R or S haplotypes

* $P = <0.05$; ** $P = <0.001$; *** $P < 0.001$
