

Firearms and suicide

The most common method of suicide in the U.S.

53%

Most firearm fatalities are from suicide in the U.S.

60%

Suicide attempts with firearms are fatal

90%

Once you pull the trigger, you can't change your mind or be rescued

Suicidal crises are short – often only a few minutes long. To prevent suicide, we need to get people through these intense periods alive

Suicidal crises are time limited

Putting **time** and **space** between a person at risk for suicide and a firearm can save a life
