

Additional file 6. Estimated aseismic moment (Nm) plotted against the number of earthquakes. Aseismic moments are computed on the three segments denoted by blue dashed lines shown in Fig. 4h. The number of earthquakes within 5 km from each segment is indicated. (A) corresponds to the northernmost segment in Fig. 4h. (B) corresponds to the middle segment in Fig. 4h. (C) corresponds to the southernmost segment in Fig. 4h.
