

Supplementary Figures S8–S12 for determinants of gestational weight gain.

Figure 8

Weights are from Random-effects analysis

Figure 1: Forest plot showing the association between low dietary diversity (<5 food groups) and inadequate gestational weight gain.

Figure 9

Figure 2: Forest plot showing the association between Meal frequency >3 times /day and adequate gestational weight gain.

Figure 10

Figure 3: Forest plot showing the association between Daily animal-source food consumption and adequate gestational weight gain.

Figure 11

Figure 4: Forest plot showing the association between early-pregnancy underweight with inadequate gestational weight gain.

Figure 12

Figure 5: Forest plot showing the association between ANC visits >3 with adequate gestational weight gain.
