

Figure S1. Representative total RNA extracted from gonadal tissues of ricefield eels at stages of female (F), early intersex (EI), mid-intersex (MI), and late intersex (LI).

Figure S2. Gene ontology classifications of DEGs in the transcriptome data of ricefield eel gonads during sex change. A: EI vs. F. B: MI vs. EI. C: LI vs. MI. X-axis shows the GO term. Y-axis shows the number of DEGs. F: female; EI: early intersex; MI: mid-intersex; LI: late intersex.
