

GRIPP2 short form for public involvement activities

Section and topic	Item	Reported on page No
1: Aim	Report the aim of PPI in the study	At page 6 some information are available on the role of the patient representative (and that of the other advisory board members). Please note that the aim of the study was investigating opinions and experience on PPI of clinicians and research nurses. The study was addressed to health care professionals. We used a questionnaire adapted from a previous questionnaire used in an EU project developed based on the literature. We involved a representative of a gynecologic oncology patient group to discuss and get feedbacks on the results, to put them in context.
2: Methods	Provide a clear description of the methods used for PPI in the study	At pages 6-7 some information are available.
3: Study results	Outcomes—Report the results of PPI in the study, including both positive and negative outcomes	Not applicable
4: Discussion and conclusions	Outcomes—Comment on the extent to which PPI influenced the study overall. Describe positive and negative effects	Not applicable
5: Reflections/critical perspective	Comment critically on the study, reflecting on the things that went well and those that did not, so others can learn from this experience	Not applicable

1. *PPI* patient and public involvement
