

Figure Legends

Fig. S1 The knockdown efficiency of siRNA targeting SIRT1 in HepG2 cells. **A** qPCR analysis of SIRT1 knockdown efficiency. Data represent the means $\pm$ SD of three independent experiments. **B** Western blot analysis of SIRT1 knockdown efficiency in HepG2 cells. Quantitative analysis of gray value on bands was performed using Image-Pro Plus software. *P < 0.05, ***P < 0.001.
