13	pro_2c_data_pub	2c. Does the submission process include one or more fields for indicating whether DATA are publicly available? Answer “Yes” if the submission process includes a “Yes/No” question (e.g., using radio buttons). Answer “Yes” if the submission process includes a field for a “data availability” or “data access” statement. Still answer “Yes” if this field includes more than “empirical data underlying reported results” in its definition “data”, so long as “empirical data underlying reported results” is included in this expanded definition (e.g., if the definition of “data” includes raw data, processed data, software, algorithms, protocols, methods, and materials). However, answer “No” if there is a RADIO BUTTON, CHECKBOX, or DROP-DROWN MENU for “indicating whether data are publicly available”, and it includes more than “empirical data underlying reported results” in its definition of “data” (e.g., if the definition of “data” includes software, algorithms, protocols, methods, and materials) Answer “Yes” if this information is requested for one or more types of studies (e.g., clinical trials).	yesno, Required <table><tr><td>1</td><td>Yes</td></tr><tr><td>0</td><td>No</td></tr></table>	1	Yes	0	No

25	pro_4a_mtrls_link	Section Header: <i>RESEARCH MATERIALS TRANSPARENCY</i> 4a. Does the submission process include one or more fields in which authors may enter a link to newly created RESEARCH MATERIALS (i.e., DOI, URL, or other persistent identifier) posted on a repository? Research materials refer to specific items that would be necessary for others to conduct an independent replication of the research, such as those used in the intervention (e.g. instructional materials, proprietary computer programs, etc.) or for data collection (e.g. questionnaires, interview guides). Consider only materials created for the current study; do not consider commercially available tools (e.g., statistical analysis programs) or materials that are being re-used from previous studies. Answer "Yes" if the submission process includes a field for providing a link to research materials, even if the field is not required. Answer "Yes" if this information may be entered for one or more types of studies (e.g., clinical trials). 32	pro_5a_gl_checklist	Section Header: <i>DESIGN AND ANALYSIS TRANSPARENCY</i> 5a. Does the submission process include a field for uploading a completed checklist for one or more reporting guidelines (e.g., a CONSORT checklist)? Reporting guidelines describe the minimum information about study methods and results that should be included in a journal article. Reporting guidelines differ from “style guides” that describe how information should be reported (rather than what information to report). Most reporting guidelines include a checklist and a flow diagram and have an acronym or name (e.g., “JARS”). There may not be an appropriate reporting guideline for some studies. Answer “Yes” if the system has a field for uploading a completed checklist with a quotation or page number corresponding to each item in the reporting guideline. Answer “Yes” if this information is requested for one or more types of studies (e.g., clinical trials). Answer “No” if the system indicates that reports must include complete information about their methods and results, but does not include a field to enter this information in the submission system itself.	yesno, Required <table><tr><td>1</td><td>Yes</td></tr><tr><td>0</td><td>No</td></tr></table>	1	Yes	0	No
