Supplementary material

To reduce bias when approaching corresponding authors with requests for data, the initial email was structured as follows:

“Subject: Data availability for research

Dear colleague,

I am contacting you regarding scientific research which was published in [Journal] in [Year], titled “[Title]”, in which you served as the corresponding author.

23 I was wondering if the research data used in your publication is available to other researchers, i.e.,
24 if you eventually could give them to me for my own research and under which conditions?

25

26 Many thanks in advance and kind regards,

27

28 Natalija Dunić, Ph. D.
