

Three Western blot images showing protein levels in Gp1 and #1 cells under S- and St(gh) conditions. The blots are labeled [pAURKA], [AURKA], and [ACTIN].

- [pAURKA]:** Shows phosphorylated AURKA. Molecular weight markers are indicated on the left (70, 42, 42 kDa). A red box highlights the band around 60 kDa.
- [AURKA]:** Shows total AURKA. A red box highlights the band around 60 kDa.
- [ACTIN]:** Shows ACTIN as a loading control. A red box highlights the band around 42 kDa.

[AURKA]

[ACTIN]
